

# HOW DO WE WANT TO GET THERE?

The Museum of Tomorrow is a center of applied sciences where the findings of contemporary sciences are a part of a narrative that engages its visitors in a journey that explores the time of great changes in which we live and the many possible paths opening up for the next 50 years. Guided by the ethical values of **Sustainability** and **Conviviality**, the Museum of Tomorrow invites our guests to consider the many different future scenarios that may result from the choices we make each day, as individuals, as a society, as Humans.

DAWN

MIDDAY

TWILIGHT

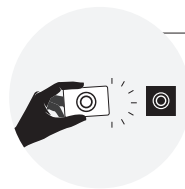

**SOLAR POWER**

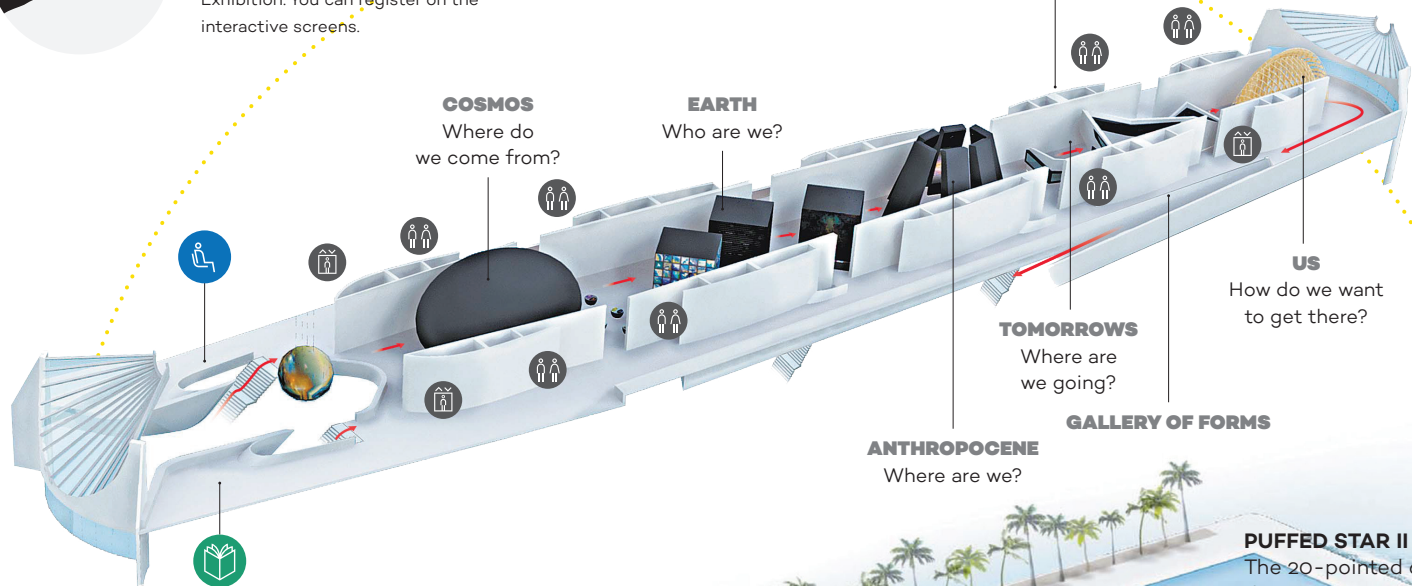

Solar panels on the roof rotate like wings following the movement of the Sun to enhance the energy harvesting. The project also uses plenty of natural lighting.

**IRIS, your digital assistant** at the Museum of Tomorrow, helps to customize your visit to the Main Exhibition. You can register on the interactive screens.

**PUFFED STAR II**  
The 20-pointed 6 meters diameter star is the sculpture Puffed Star II, by north american artist Frank Stella. It was donated to the Museum.

**MUSEUM GARDENS**  
24 native species from the Atlantic Forest and Restinga, a spit and a distinct type of coastal tropical and subtropical moist broadleaf forest typical of the coastal region of Rio de Janeiro, make up the Museum Gardens, which are open for free visitation.

**REFLECTING POOLS**  
The water from the Guanabara Bay sustains both reflecting pools and the cooling system of the building, where it's used for the heat exchange.
